

Diego Felix Amachi Flores

Software Engineer & Creator

dev101101@github

Lima, Peru

PROFILE

Software Engineer since 2022 with a focus on building scalable backend systems and interactive web applications. Core expertise in Node.js, TypeScript, and React, with strong database experience across PostgreSQL, MySQL, and SQLite. Passionate about automating business workflows, AI-powered tools for small enterprises, and crafting polished user experiences. Advanced user of AI with deep understanding of context management and token efficiency. Proficient in Git and LazyGit for version control and streamlined development workflows.

SKILLS

TypeScript

React

Node.js

Rust

Java

PostgreSQL

MySQL

SQLite

AI / Token Management

Git / LazyGit

PROJECTS

Contab

Automated purchase and sale invoice registration system for accounting. Eliminates manual data entry and reduces errors for small businesses.

TypeScript

Contab2

Extension of Contab adding receipt-by-honorarium management, mass export formats, and a monthly tax declaration worksheet.

TypeScript

ContabIA

AI-powered evolution of Contab for micro and small businesses. Features automatic USD-to-PEN conversion, intelligent tax recommendations, and planned voice-activated invoice issuance.

TypeScript, AI

Portfolio — Desktop Simulator

Full desktop environment in the browser: draggable icons, resizable windows, in-browser SQLite database, 4 themes, CLI terminal, file editor, and dev.to blog integration. Built with React 19, TypeScript, Vite, and sql.js.

React, TypeScript, sql.js, Vite
